

Keystone XL

Safety is our number one value

At Keystone XL, nothing matters more than the health and safety of our people, their families and communities. We're all in this together and we thank you for doing your part to help keep each other safe. Here are some of the important steps we're taking to prevent the spread of COVID-19:

Adhering to all health directives and government guidelines to slow the spread of COVID-19

Utilizing global medical experts, International SOS, to ensure workers have 24/7 access to medical care and advice, and to reduce strain on local health infrastructure

Enhanced screening measures to assess workers for potential symptoms, and providing self-isolation practices to support workers who may have symptoms

COVID-19 training will be provided to all employees upon arrival to site and physical distancing requirements will be maintained

Increased access to hand-washing facilities, and enhanced cleaning and disinfection at work site

For a full list of measures and project updates, please visit [Keystone-XL.com](https://www.Keystone-XL.com)
